2. The application has been amended as follows:

- Claim 1 has been amended as follows:

1. (Currently Amended) An apparatus for supplying drinking water comprising:

a container in which drinking water ~~such as natural water or tap water~~ is stored and which is arranged detachably on a support;

a water cooler which is able to cool drinking water guided from said container;

a sterilizer which is installed in said water cooler and is able to sterilize drinking water in the water cooler;

a cold water valve for controlling supplying operation and stopping operation for drinking water in said water cooler;

a container detecting means which is able to detect whether or not said container has been detached from said support; and

a control means which is ~~able~~ adapted to control and to drive said sterilizer over a predetermined period when said container detecting means has detected a state in which said container has been detached from said support.

- Claim 11 has been amended as follows:

11. (Currently Amended) An apparatus for supplying drinking water comprising:

a container in which drinking water ~~such as natural water or tap water~~ is stored and which is arranged detachably on a support;

Reasons for Allowance

3. The following is an examiner’s statement of reasons for allowance:
 - The closest cited art—JP 2000-85893; Davis et al. (U.S. 7,175,054); Lee (U.S. 6,786,255); Matsumoto, et al. and GB 2,289,045—fail to anticipate or render obvious, alone or in any proper combination, the control means which is adapted to control and to drive said sterilizer over a predetermined period when said container detecting means has detected a state in which said container has been *detached* from said support—in combination with all the other limitations in claims 1 or 11.
 - The examiner initiated contact with the aforementioned attorney in order to recommend changes to the claims that would put the application into condition for allowance. As a result the independent claims were amended to require the container detecting means to be able to detect a state in which the container has been detached *from the support*. The claims were also amended to correct for indefiniteness. During the interview no exhibits were shown nor prior art discussed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Terry K. Cecil whose telephone number is (571) 272-1138. The examiner can normally be reached on 8:00a-4:30p M-F..
